Index by subject matter (thematic review) Journal of Medical Ethics, volume 19, 1993

Editor's Note

This combined index and thematic review was introduced in the hope that it would be more useful to readers than the old system. In the first part, papers and book reviews are classified using the American National Reference Center for Bioethics Literature Library Classification Scheme (the Kennedy system), which is printed on page 252. In the second part authors, reviewers, papers and book reviews are arranged alphabetically, with their Kennedy classification following.
